Assignment 01

Task 2

D/ADC/23/0012 - S.A.R Maleesha

D/ADC/23/0032 - W.A.K.N Wedagedara

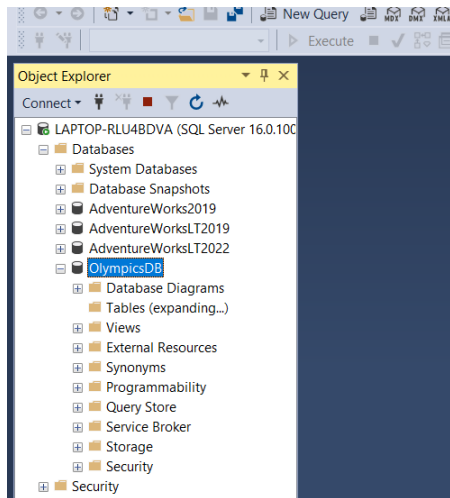

D/ADC/23/0033 - K.G.K Chani

D/ADC/23/0039 - H.W Kaweesha

TASK 2

- Create an OlympicsDB new database in SQL Server

- We imported the dataset into the OlympicHistory table within the OlympicsDB database. The data was cleaned and preprocessed by handling missing values, correcting inconsistencies, and removing duplicates. A connection between Report Builder and the OlympicsDB was successfully established, allowing direct access to the OlympicHistory table. Finally, we tested and confirmed the ability to query the table from the Report Builder.

Trend Analysis

1. Yearly Team Representation by Gender (Bar Chart on the Left):

- The chart displays the participation of a gender category labeled "F" over time.
- **Consistent growth** is observed between 1988 and 1996, with a steep increase between 1988 and 1992.
- Between 1996 and 2016, the participation remains relatively **stable**, with values fluctuating slightly around 140-160 participants per event.
- The **initial low participation in 1988** contrasts with the higher and more consistent representation in subsequent years.

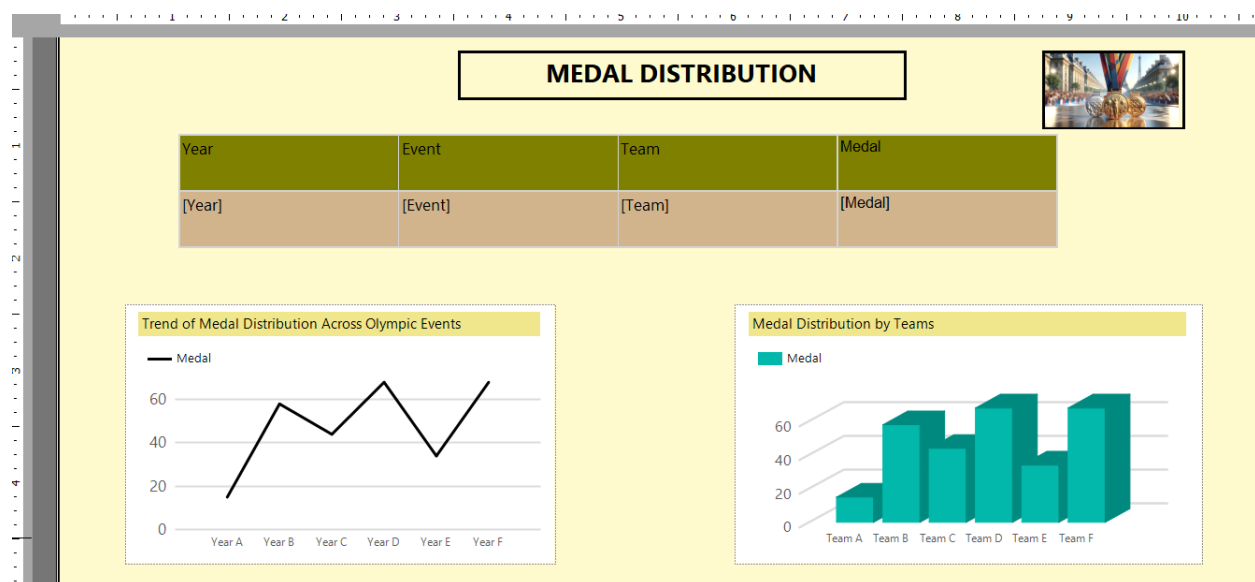

2. Team Participation Trends Over the Years (Line Chart on the Right):

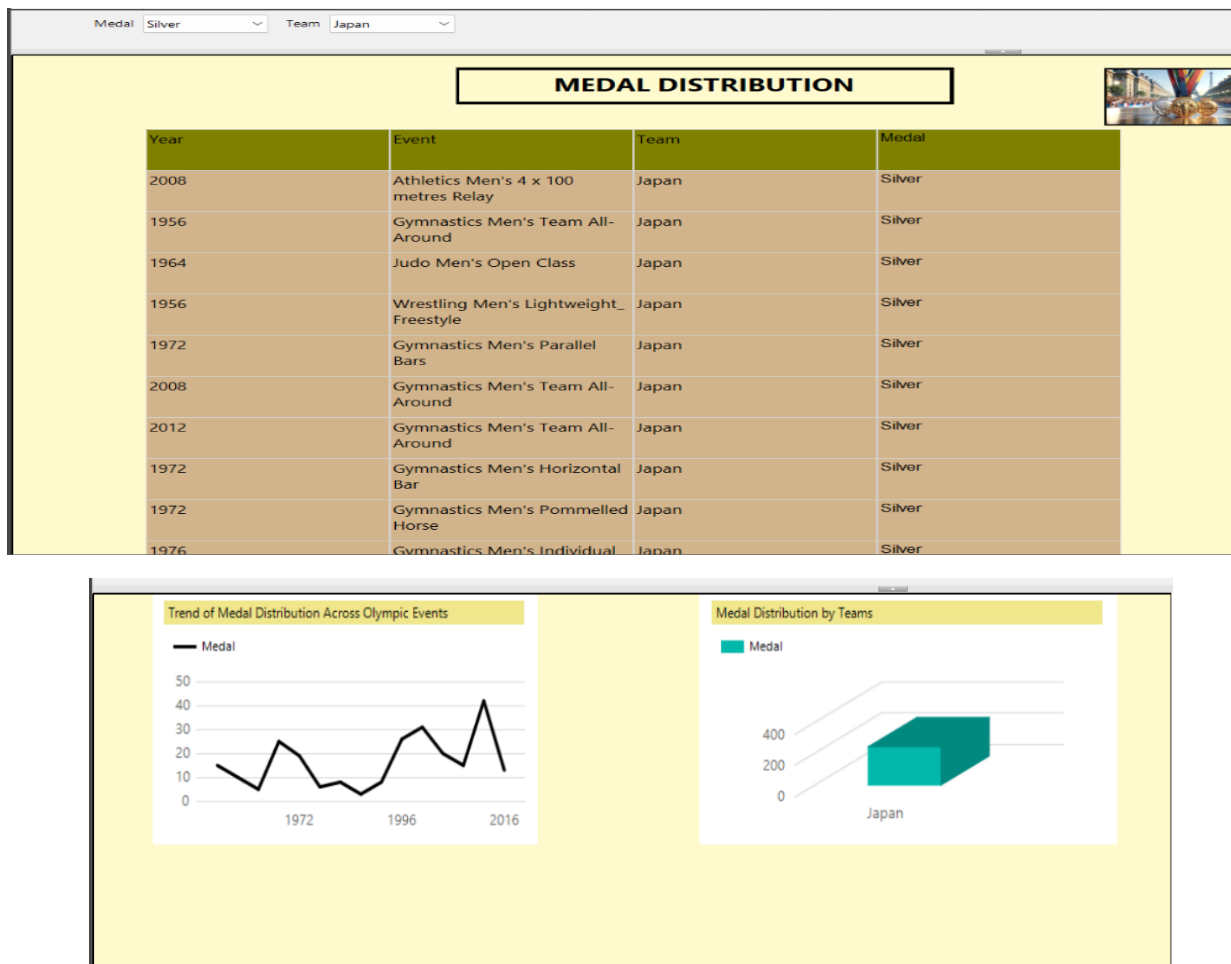

- This chart illustrates overall team participation trends across the same years.
- There was a **sharp rise from 1988 to 1992**, followed by a more **gradual increase and stabilization** from 1992 to 2016.
- Despite minor fluctuations, the trend from 1996 onwards shows a **general upward trajectory** with a slight peak around 2012 and stability in 2016.

Key Patterns:

- **Rapid early growth:** Both charts show significant growth in team participation between 1988 and 1992, indicating a period of rapid expansion.
- **Stabilization:** From 1996 onward, both gender representation and overall team participation levels appear to **stabilize** with minor fluctuations.
- **Sustained high levels:** Team participation maintains a **high level of engagement** from 1992 onward, reflecting consistency in Olympic participation.

2. MEDAL DISTRIBUTION

3. Trend Analysis

• The trend of Medal Distribution Across Olympic Events (Line Chart on the Left):

- There appears to be a **fluctuating pattern** in the number of silver medals won by Japan over time.
- From 1972 to 2016, there were **notable peaks** around 1996 and 2016, where Japan won significantly higher medals.
- There are also periods of **decline**, particularly around the 1980s and early 2000s, where the medal count dropped before rising again.
- The **highest peak** in silver medal distribution seems to occur around the 2016 Olympic Games.

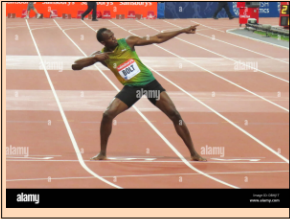

❖ Medal Distribution by Teams (Bar Chart on the Right):

- The bar chart indicates that Japan won around **400 silver medals**.

General Trends:

1. **High Achievement in Specific Events:**
2. **Repeated Success by Certain Athletes:** Some athletes appear multiple times in the table, winning multiple gold medals across different events. This suggests consistency in top performance by certain individuals specializing in multiple categories.
3. **Strong Focus on Strength and Skill-Based Sports:**
